

International Journal of Energy Sector Management

Special issue on: Uses of Frontier Efficiency Methodologies and Multi-criteria Decision Making for Performance Measurement in the Energy Sector

The International Journal of Energy Sector Management is a peer-reviewed, inter-disciplinary international platform for disseminating results of research related to and/or relevant for the management of the energy sector.

This special issue aims to focus on holistic, applied research on Performance Measurement in Energy Sector Management and for publication of relevant applied research to bridge the gap between industry and academia. We, therefore, seek high-quality papers that will contribute significantly to performance improvement of Energy Sector.

Subject Coverage

Examples of topics appropriate to the theme of this special issue, but are not limited to:

Methodological topics:

- Data Envelopment Analysis (DEA)
- Stochastic Frontier Analysis (SFA)
- Multi-criteria Decision Making (MCDM)
- Analytical Hierarchy Process (AHP)

Applications:

- Gas and gas industry
- Electricity and Electric industry
- Nuclear energy
- Oil and Pipeline
- Energy efficiency
- Power plant
- Power supply
- Green energy
- Environmental concerns in energy sector management
- CO2 emission and energy sector
- Climate change and efficient use of energy

Manuscript Preparation

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere.

Please refer to the Journal Information and Author Guidelines for additional information on manuscript preparation at <http://info.emeraldinsight.com/products/journals/journals.htm?id=IJESM>

IMPORTANT DATES

30 July 2009	→	Submission Deadline (early submission recommended, referee process starts once the paper received)
30 Dec 2009	→	Notification of status & acceptance of paper
30 March 2010	→	Revised manuscripts
30 July 2010	→	Final version of paper
